Listed equity	☐ We incorporate ESG into our external manager appointment process
	✓ We incorporate ESG into our external manager monitoring process
	☐ We do not do ESG incorporation
00 11.4	Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.
Our two ex	ternally managed equity funds Synergy Smaller Cies and Synergy Emerging Markets are co-managed by local fund managers.
- Synergy E	Emerging Markets :
	e analyzed the current ESG practices of each fund manager of the fund by sending them a detailed survey and presented the results as well as our ach during the investment committee. Based on these exchanges, we proposed a ground for a common ESG approach including common exclusion

In 2017, we analyzed the current ESG practices of each fund manager of the fund by sending them a detailed survey and presented the results as well as our own approach during the investment committee. Based on these exchanges, we proposed a ground for a common ESG approach including common exclusion crtieria, integration of Governance criteria, ESG controversy monitoring, PRI membership and proxy voting. In addition, we supported our partners individually in the development and implementation of their approaches by sharing our experience and ressources on an ad-hoc basis. The outcome is a success with two asset managers signing up to the PRI and four out of five formally integrating ESG criteria in their investment decision making.

- Synergy Smaller Cies :

We incorporate ESG informally into the monitoring process.

The ESG performance of companies within the portfolio was adressed on an ad-hoc basis during investment committees.

Sycomore AM's strategy is based on active fund management. Stock selection is the main source of alpha of Sycomore AM's investments. The sustainability of our performance relies on a rigorous and structured investment process that underpins fundamental analysis and portfolio construction.

Company analysis and valuation are processed through our database and proprietary tool SYCOVALO, which is shared by every member of the fund management team. SYCOVALO structures all stock analyses and valuation process. It incorporates:

- Quantitative data: 12 years of accounts history, 3 years of forecasts, consensus comparison, valuation ratios, profitability level and growth rates, etc.
- Qualitative data: SPICE ratings, competitive environment assessments, SWOT analyses, growth perspectives, top management quality, meeting/visits reports, etc.

Among the 2,400 stocks computed within our database, approximately 800 companies are actively followed, which means that their valuation target has been updated within the past 6 months.

Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.
res
SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.
Sycomore AM's policy regarding potential conflicts of interest is endorsed and supervised by our compliance department, which is composed people.
Regarding proxy voting, as outlined in the dedicated section of our voting policy:
We have identified two potential risks that could lead to a conflict of interests:
- A board member of the company concerned is also a large client of Sycomore AM or one of its affiliates;
- A board member of the company concerned is also an associate or corporate officer at Sycomore AM or one of its affiliates;
To prevent these risks:
- Sycomore AM does not deviate from its voting policy, which is drawn up independently from its client relations;
Ol Oli

O No Sycomore AM carries out a full monitoring of the controversies that affect the companies within its investment universe, based on very diverse sources including press, NGOs, unions, sell-side analysis. In addition to these primary sources, we use MSCI ESG controversies research. It enables us to have access to a detailed and qualitative analysis of controversies as well as to get a more homogeneous assessment of controversies among our universe. The monitoring is embedded in our ESG analysis process as it has a direct bearing on a company's ESG rating: every controversy point lowers the relevant stakeholder group's rating by 0.1 point. We assess the severity of controversies from 0 to -3 controversy points, based on the perimeter affected, the degree of certainty, the consequences, and the reaction of the company. Every company affected by a -3 rated controversy is excluded from our SRI investment universe. Furthermore, a controversy will trigger an engagement action from our side if the company has not provided adequate answers or taken the necessary actions to manage the controversy Gateway/Core Assessed General Indicate if and how frequently your organisation sets and reviews objectives for its responsible investment activities O Quarterly or more frequently O Biannually ✓ Annually O Less frequently than annually O Ad-hoc basis O It is not set/reviewed Additional information. [Optional] Weekly internal ESG meetings aim at coordinating development, marketing and portfolio management teams. As a consequence, new objectives can be set and reviewed relatively frequently. Once a year, there is a formal appraisal of the work carried out by the ESG team ☑ Provide training on ESG incorporation Provide training on ESG incorporation Training cycle on Human Rights provided by external experts: 1 full day for the whole investment team and 2 additionnal full days for the ESG team - Training cycle on our new environmental impact metric (Net Environmental Contribution) provided by the ESG team to the whole investment team (10 x 2-hours sessions) - Half day of training on the assessment of social climate within a firm, provided by external experts to the whole investment team - 2 full days of external training on corporate governance and proxy voting for 2 ESG team members and 1 portfolio manager - 2 hours training session on the update of our governance analysis framework and our proxy voting policy provided by the ESG team to the whole investment team Update of the user guide for the internal ESG analysis tool (SPICE) - Continuous one-to-one or small group training in-house ☑ Provide training on ESG engagement Delivery of engagement training to ESG team members and fund managers during one-on-one meetings (practical, informal training) - minimum 10 team members trained on engagement practices during one-on-one meetings with companies  $f {\it f Z}$  Improved communication of ESG activities within the organisation Communication of ESG activities within the organisation · 2 internal discovery sessions provided by members of the ESG team to the whole company (environmental analysis and human capital) - Internal ad-hoc communications on ESG activities (French government's SRI Label awarded to Sycomore Shared Growth, publication of fundspecific ESG performance reportings, implementation of a new controversy monitoring process...)

- Sycomore AM's annual conference on mission-led companies and the importance of ESG  $f m{\boxtimes}$  Improved engagement to encourage change with regards to management of ESG issues Take part in collaborative engagements - In 2016, we joined the Human Capital Management Coalition, Sycomore AM's first collaborative engagement which we continued to be actively involved with in 2017 - In 2017, we also joined the PRI collaborative engagement on tax ☑ Improved ESG incorporation into investment decision making processes Improvements to our methodology - Co-developed in partnership with Icare, Quantis and BPSS an updated version of our proprietary environmental impact metric (Net Environmental Contribution): specific methodology developed for 20 value chains, metric computed for more than 1000 issuers - Developed an analysis framework aimed at assessing the societal contribution of a company's products and services based on their alignement with the UN Sustainable Development Goals - Continuous improvement of our SPICE model (internal analysis framework): included new criteria in the Society pillar, refined and simplified the People (Human Capital) and Governance pillars - Enriched our controversy monitoring process by integrating MSCI ESG controversies research, giving us access, on top of the primary sources already used, to in-depth and consistent controversies analysis as well as 9,800 company specific controversies history reports. Other, specify (1) Other, specify (2) Other, specify (3) lacktriangledown Increase portfolio performance by consideration of ESG factors Incorporate ESG considerations in company analysis to generate alpha - Long-standing goal which is not specififc to 2017 Other, specify (1) Other, specify (2) Other, specify (3) ☑ Joining and/or participation in RI initiatives Participation in and support of various RI initiatives and events - Sponsored the PRI academic prize and the French FIR-PRI prize - Sponsored and participated to the PRI in Person conference in Berlin - Joined the collobaorative engagement on tax ☑ Encouraging others to join a RI initiative Number of organizations encouraged to join the PRI - Presented the benefits and implications of PRI membership to the asset management firms involved in our fund Synergy Emerging Markets and encouraged them to become signatories - Progress achieved: 2 of our partners became signatories in 2017 ☑ Documentation of best practice case studies Publication of case studies Published a caste study on Human Capital integration to the investment process in the PRI 2017 Practical Guide to ESG Integration (focus on social issues).

Indicate whether your organisation uses investment consultants. Yes, we use investment consultants ✓ No. we do not use investment consultants Indicate if your organisation executes scenario analysis and/or modelling in which the risk profile of future ESG trends at portfolio level is ■ We execute scenario analysis which includes factors representing the investment impacts of future environmental trends We execute scenario analysis which includes factors representing the investment impacts of future social trends ☐ We execute scenario analysis which includes factors representing the investment impacts of future governance trends 🔘 We consider scenario analysis that includes factors representing the investment impacts of future climate-related risks and opportunities ☐ We execute other scenario analysis, specify ☐ We do not execute such scenario analysis and/or modelling Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic We do the following ☐ Allocation between asset classes Determining fixed income duration ☐ Allocation of assets between geographic markets Sector weightings ✓ Other, specify Stock nicking  $\hfill \square$  We do not consider ESG issues in strategic asset allocation SG 13.3 Additional information. [OPTIONAL] Our environmental impact metric NEC (Net Environmental Contribution) is designed to model the degree of alignement of a portfolio with the energy and environmental transition. Thanks to its roll-out completed in 2017 with our partners I Care & Consult, Quantis and BPSS, we were able to compute the NEC of each portfolio (that we started disclosing on montlhy reportings in February 2018) and the aggregated NEC of Sycomore and to compare it to the NEC of The Net Environmental Contribution measure is a key driver of the Environmental grade assigned to a company in our ESG rating system (called SPICE), which then impacts the Beta used for valuation and thus the stock picking. We do not currently execute 2°C alignement scenario analysis, as climate impact are taken into account in the NEC. Describe the process used to identify short, medium and long-term risks and opportunities that could have a material impact on your organisation and its activities. Our SPICE rating model enables us to identify key risks and opportunities. Please find more information in our ESG integration policy Describe the processes used to determine which climate-related short, medium and long-term risks and opportunities could have a SG 14.1 CC Climate related risks and opportunities are captured through our environmental impact metric (NEC - Net Environmental Contribution). For more information on the NEC, please see: https://en.sycomore-am.com/files/B/P/59f89a91-BP2S\_Sycomore\_AM\_Brochure\_NEC\_EN.pdf The press release: https://en.sycomore-am.com/Our-Magazine/2017/06/380-BNP-Paribas-Securities-Services-and-Sycomore-AM-sign-research-partnershipon-an-advanced-green-finance-metric Some investment risks and opportunities arise as a result of long term trends. Indicate which of the following you act on. Changing demographics Climate change and related issues SG 14.2a cc Please describe how you define "short", "medium" and "long term", and describe your material climate-related issues over these time horizons

	Definition	Description of material climate-related issues
Short term	1-2 years	GHG emissions, adaptation to climate change, increase in the frequency of extreme weather events, increase in temperatures volatility, increase in water stress
Medium term	3-5 years	Same as short term: GHG emissions, adpatation to climate change, increase in the frequency of extreme weather events, increase in temperatures volatility, increase in water stress
Long term	> 5 years	Same as short/medium term + impact of "climate refugees" and a decrease of ecosystems resilience

# Indicate which of the following activities you have undertaken to respond to climate change risk and opportunity ☑ Established a climate change sensitive or climate change integrated asset allocation strategy ☑ Targeted low carbon or climate resilient investments Reduced portfolio exposure to emissions intensive or fossil fuel holdings ☑ Used emissions data or analysis to inform investment decision making **☑** Sought climate change integration by companies ☐ Sought climate supportive policy from governments Other, specify ☐ None of the above Indicate which of the following tools you use to manage emissions risks and opportunities ☐ Scenario analysis ☑ Disclosure on emissions risk to clients/trustees/management/beneficiaries ☐ Climate-related targets ☑ Encourage internal and/or external portfolio managers to monitor emissions risk Emissions risk monitoring and reporting are formalised into contracts when appointing managers ☐ Weighted average carbon intensity ☐ Carbon footprint (scope 1 and 2) Portfolio carbon footprint ☐ Total carbon emissions Carbon intensity ☐ Exposure to carbon-related assets Other emissions metrics ✓ Other, specify other description Developed an environmental impact metric (NEC) taking into account climate as well as 4 other categories of environmental impacts (please see above). ☐ None of the above ☑ Resource scarcity

▼ Technology developments Other, specify(1) Other, specify(2)

☐ None of the above

SG 14.5

#### SG 14.6 Additional information [Optional]

In 2017, we achieved our project to upgrade and extend our internal metric called NEC (Net Environmental Contribution), quantifying the alignement of business model to the energy and ecological transition. This is an environmental impact metric, which can be used in the investment decision process as well as

Co-developped in partnership with I care & Consult, Quantis and BPSS, it now covers 20 value chains with a specific analysis framework for each and the metric has been computed for over 1,000 issuers.

For more information, please see:

https://en.sycomore-am.com/files/B/P/59f89a91-BP2S\_Sycomore\_AM\_Brochure\_NEC\_EN.pdf Describe your risk management processes for identifying, assessing, and managing climate-related risks. Please describe Our environmental contribution metric (NEC) is integrated within the E pillar of our SPICE analysis, which is our overall ESG risk (and opportunities) Our process for climate-related risks is not integrated into our overall risk management Describe your processes for prioritising climate-related risks. We prioritise climate-related and more globally environmental-related risks by value chains (sectors), based on the intensity and materiality of impacts and categorize each value chain within one of 3 impact ranges (strong, moderate and limited) Do you conduct engagement activity with investee companies to encourage better disclosure and practices around climate-related risks? ✓ Yes Please describe We do not currently have a specific engagement program dedicated to climate-related practices and disclosure. However, those issues are very often part of our dialogue with investee companies, through our meetings with management or sustainability teams. In particular, we frequently ask companies for additional information and disclosure on their environmental impacts when we are in the process of computing their NEC score. ■ No, we do not engage SG 14.10 CC Describe how you use data from climate-related disclosures. Climate-related data can be used within the NEC score calculation (depeding on sector) and in the Environment pillar of our SPICE analysis. Descriptive PRI 1 Indicate if your organisation allocates assets to, or manages, funds based on specific environmental and social themed areas. ✓ Yes SG 15.2 7% Specify which thematic area(s) you invest in, indicate the percentage of your AUM in the particular asset class and provide a brief Area ☑ Clean technology (including renewable energy) Listed equity 0.5% of AUM ☐ Fixed income - SSA ☐ Fixed income - Corporate (financial) ☐ Fixed income - Corporate (non-financial) ☐ Fixed income - Securitised ☐ Hedge funds ☐ Cash Other (1) Sycomore AM invests specifically in this thematic area through Sycomore Eco Solutions. prices through beta adjustment, required margins of safety and portfolio construction are all impacted by company ESG scores.

- SPICE: The ESG analysis model is integrated into a "fundamental analysis" model named SPICE. SPICE is based on a stakeholder approach (Suppliers&Society, People, Investor, Customer and Environment) and integrates the analysis of the business model and economic fundamentals of the company within the Investor part. Thus, the result of the fundamental analysis, namely the SPICE rating, is a mix of ESG and financial analysis, which reflects our view of the company's ability to create value for its stakeholders over the long term.
- Centralised database: Sycomore AM's investment team uses a centralised database, which combines financial and ESG information within the same valuation tool.
- Engagement monitoring tool: Sycomore AM integrated a centralised engagement database within its proprietary research and valuation tool, allowing any investment team member to record engagement actions and information on the goal of the engagement, the reaction of the company as well as progress achieved
- Controversies: Sycomore AM also developed its own proprietary tool for the analysis of controversies. Depending on their severity and recurrence, controversies directly impact company ESG scores (1 controversy point = -0.1 point on the grade of the affected stakeholder).
- ESG performance reporting: Since 2017, we publish an annual ESG performance report for our SRI funds, displaying the evolution of key ESG metrics aggregated at portfolio level, as well as examples of tangible social or environmental impacts of companies held in the portfolio and engagement actions conducted during the year.

# Additional information [Optional]

Our RI Transparency report is published annually on our website. We disclose all indicators publically.

In addition :

- Since March 2012, all monthly fund reports integrate a specific ESG section.
- Since January 2015, we integrate in our reporting the carbon footprint of a vast majority of our funds.
- Since January 2015, we publish three or four times a year an SRI newsletter.
- Once a year, we update our "code de transparence AFG/FIR" and our reporting in compliance with the Article 173 of the French law on the Energetical and Ecological Transition. These reports give specific details on our integration methodology for ESG issues in our funds.
- Since 2017, we publish an annual ESG performance report for our SRI funds, displaying the evolution of key ESG metrics aggregated at portfolio level, as well as examples of tangible social or environmental impacts of companies held in the portfolio and engagement actions conducted during the year.
- As of January 2018, our votes by resolution are disclosed online for all shareholders' meetings we vote at, on the day following the meeting.

Our ESG integration policy as well as other documents relevant to ESG integration in listed equity (environmental strategy, exclusion policy, voting policy and engagement policy) are available on our website.

#### Description

1. Exclusion of all controversial weapons for all investments

In line with the Oslo and Ottawa conventions, Sycomore AM excludes any investment in controversial weapons

2. Exclusion policy for SRI funds

It also excludes any investments in companies involved in controversial weapons. For SRI funds, we do not invest in companies that are involved in the following activities: production of weapons or weapon systems, coal extraction, GMOs, nuclear power, oil extraction from tar sands, oil extraction through hydraulic fracking, shale gas extraction, tobacco products, and that derive more than 5% of their revenue from these activities as well as companies that have more than 10% of their revenue that derives from thermic coal generation and companies whose activities clearly infringe the UNGC.

3. Negative screening for SRI funds

Please see our Transparency Code for SRI listed equity funds that describe negative screening criteria in details:

 $https://www.sycomore-am.com/5a300ed6-SYCOMORE\_-Fonds\_SSR\_SH\_W\_SES\_SSG\_-Code\_de\_transparence\_AFGFIR\_-122017.pdf$ 

- ✓ Positive/best-in-class screening
  - **☑** Product
  - ✓ Activity
  - ☐ Sector
  - ☐ Country/geographic region
  - ☑ Environmental and social practices and performance

#### Description

Sycomore AM's main SRI equity fund (Sycomore Selection Responsable) also selects companies that offer sustainable development opportunities:

- E: good environmental positioning of products and services (recycling, energy efficiency, sustainable building, sustainable transport...)
- S: job creation (positive average growth of the workforce over the past 3 years)
- G: protection of minority shareholders (absence of poison pills, absence of multiple classes of shares or voting rights, voting caps...)

Our thematic funds (Sycomore Eco Solutions, Sycomore Happy@Work and Sycomore Shared Growth) include criteria in order to select companies that are respectively well positioned to benefit from the ecological and energy transition, the strong integration of human capital in company strategy, or their positive impact on society.

- ✓ Norms-based screening
  - ☑ UN Global Compact Principles
  - ☐ The UN Guiding Principles on Business and Human Rights
  - ☑ International Labour Organization Conventions
  - ☐ United Nations Convention Against Corruption
  - OECD Guidelines for Multinational Enterprises
  - Other, specify

# Description

Sycomore AM's SRI funds will not invest in companies that contravene international norms.

# LEI 04.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

For all our SRI funds, negative and positive selection criteria have been established and clearly communicated to clients and/or beneficiaries through the prospectus, the transparency codes and the commercial documentation. No change have been made since the creation of each SRI fund.

However, we are constantly improving our ESG integration methodology: for instance, in 2017 we have reviewed our Society screening methodology to better assess companies according to the social contribution of their products and services as well as according to the corporate citizenship. We have also implemented our Net Environmental Contribution metric on our screening universe.

LEI 05 Mandatory Core Assessed PRI 1

.El 05.1 Indicate which processes your organisation uses to ensure screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Ompanies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- 🗹 External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- ☐ Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies.
- 🗹 A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- $\ensuremath{\mbox{\ensuremath{\mbox{$\sc d}$}}}$  A periodic review of the quality of the research undertaken or provided is carried out
- Review and evaluation of external research providers
- ☑ Other, specify

Sycomore Share	
The fund aims to	o invest in companies that have a positive impact on society. The stock selection process takes into account two dimensions of societal tribution of goods and services, which reflects how a company's business is aligned with major societal issues, and corporate ch reflects how a company conducts its business and the more or less positive externalities that these choices entail for society.
business line to the priorities de data collected b	a rating for the societal contribution of goods and services, we review the company's sales revenue in order to assess the contribution the four pillars that we have defined: Access & Inclusion, Health & Safety, Justice Progress & fulfilment and Employment. These pillars of fined in the UN Sustainable Development Goals as well as broader human development themes. To help us complete this analysis, we usely the ESG research firm. Oekom in their Sustainability Solutions. Assessment analysis, also shown as a percentage of sales income consequences, as well as information provided by the companies themselves.

The corporate citizenship grade is based on 7 qualitative criteria, such as business ethics, tax responsibility, relationships with local communities..., identifying both risks and opportunities arising from corporate behaviour.

#### Sycomore Eco Solutions

We concentrate on businesses and sectors that interact strongly with the environment and analyse the environmental impact of each company's products and services. Therefore, Sycomore Eco Solutions focuses on five key areas: mobility and transport, the circular economy, renovation and construction, energy production and management, and ecosystem-related businesses. Our proprietary methodology relies on an environmental quantification process that measures, for each business, the extent to which companies align with the energy and environmental transition. We only invest in companies that have more than 10% of their revenues that actively contribute to this transition.

Also, the fund systematically steers clear of businesses that destroy natural capital. The investment approach is based on strong exclusion criteria (coal, intensive farming, minimum ESG rating...) and on a strategic stock selection process.

Sycomore AM also set up a strategic environment committee of experts with academic, institutional, corporate and NGO backgrounds. This committee is a venue for members to exchange critical and constructive views on complex environmental issues.

## Sycomore Happy@Work

Sycomore Happy@Work was launched in 2015. It aims to invest in companies that recognise employee engagement and well-being as a key performance driver (several studies indicate that well-being at work reduces absenteeism, work accidents, turnover and drives creativity, engagement, sales and productivity).

We have identified five key pillars that enable employee happiness and engagement, at an individual level: equity, autonomy, sense of purpose and meaning, evolution and development and a good working environment.

A full assessment includes:

- an analysis of how companies perform on the five pillars and how it is organised to manage human capital,
- an assessment of other ESG metrics, since a minimum ESG score is required for a company to be eligible to the fund.

It is based on:

- public documents and meetings with operational management (Human Resources teams for example) where we seek both quantitative and qualitative information.
- on-site visits and employees' interviews when possible for small companies when representative and relevant,
- interviews of experts and ex-employees,
- anonymous testimonies on specialized websites,
- controversies assessments related to human capital management.

# LEI 13.2 Describe how you are able to determine these outcomes

Our Risk Management team provides yearly analysis of the performance (risk and return) of the stocks with the highest and lowest ESG ratings within our investment universe against the performance of our SRI funds over the past 7 years.

In addition to that, they perform ad-hoc analysis on specific ESG crtieria. In 2017, we analyzed :

- the correlation between our environmental impact metric (NEC) and the financial performance of the more than 1.200 to which we assigned a NEC
- $\hbox{- the correlation between our internal People rating and the performance of holdings within our Happy@Work funds}\\$

We publish annual ESG performance reports for all SRI funds (see 2017 reports here: https://www.sycomore-am.com/5ab4d40e-Sycomore\_AM\_Reporting\_performance\_ESG\_2017\_Fonds\_ISR\_vf.pdf). So far the evidence varies tremendously from one indicator to the other and is difficult to agregate. Therefore we cannot assert whether the overall impact is positive or negative.

	<b>☑</b> ESG issue 1				

### ESG issue and explanation

Human Resources management practices and social climate within call centers of a telecom company

Following a controversial TV report on an investee company, denouncing abusive social practices and punitive dismissals of employees protesting against their working conditions, Sycomore entered into a dialogue with the top management, formulated a number of engagement asks and conducted an onsite visit in a call center to further investigate those allegations.

Until the controversy was aired, our analysis of the social practices of the company had revealed positive signals (choice of the company to internalize call centers rather than pass on social risks to subcontractors, low absenteism compared to peers).

Combination of ESG incorporation strategies

### Impact on investment decision or performance

This controversy and the response of the company upon engagement, which we judge insufficiant so far, resulted in the decision to sell our position in our social thematic fund, and to halve our position in other SRI funds, while waiting to see whether the company demonstrates some progress on our engagement asks in the coming months.

# **☑** ESG issue 2

## SG issue and explanation

The stock selection process of our SRI fund Sycomore Eco Solutions aims at selecting companies that are best postitionned to benefit from and foster the ecological transition.

Champions of the energy and ecological transition are also attractive acquisition targets for traditionnal players.

# Thematic

## Impact on investment decision or performance

In 2017, this resulted in 2 holdings (out of an average of 50 holdings), both pure players of the sustainable mobility sector (respectively electrive cars and railway), being acquired. Those operations generated significant financial overperformance for the fund.

More generally, holdings of the fund operate in dynamic sectors experiencing profound transformation due to the ecological transition: since its launch in 2016, 25% of investee companies have undertaken major strategic financial operations (acquisitions, IPOs, capital increases...) that generated significant shareholder return.

factors	Social
ESG issue	Human Resources data monitoring and reporting
Conducted by	Individual / Internal
Objectives	Encourage small and mid-sized companies to structure HR data monitoring and reporting and set up an employee satisfaction survey.
	2 companies targeted based on our ongoing dialogue with them and the current state of their HR practices.
	The engagement was conducted by Sycomore AM, in partenership with consulting firm Better Human.
Scope and Process	The first phase of the project, exclusively financed by Sycomore AM, consisted in collecting and analysing key HR materials for those 2 companies.
	The second phase of the project would have been for the companies to continue working with the consulting firm to set up an employee satisfaction survey.
	The first phase was completed for the 2 companies and enabled them to identify or confirm key HR strengths and weaknesses. In particular, it helped the smaller of the two companies to structure its HR data monitoring process.
Outcomes	However, none of the targeted companies decided to proceed with phase 2. At the moment, they have yet to put in place an employee satisfaction survey.

LEA 15.4 Provide a brief overview of your organization's approach to (proxy) voting.

Since 2011, Sycomore AM has developed and implements a voting policy.

Since 2015, we systematically vote for all companies in our portfolios. All votes are carefully analysed by the governance team (5 ESG analysts involved) and instructed following Sycomore AM's own voting policy, with the support of our proxy voting agency ISS.

All strategic voting decisions are systematically discussed and made in consultation with the financial analyst/portolio manager following/holding the concerned stock.

Sycomore AM does not take part in any security lending.

		. 401010	Governance					
	-	ESG issue	Employee shareholding					
		Conducted by	Individual/Internal					
		Objectives	Support the development of employee shareholding, a key fact	tor of employee's motivation				
			This principle is applied to the whole voting scope.					
		Scope and Process	In order to encourage employee shareholding, we have set no increases reserved for employees, providing reasonable dilutio		capital			
		Outcomes	As a result, we voted for 100% of capital increases reserved fo	r employee share purchase plans submitted to our approva	l in 2017.			
	✓ Add Example 3		<u>'</u>					
			☐ Environment					
		ESG Factors	☐ Social					
			<b>☑</b> Governance					
		ESG issue	Executive remuneration					
		Conducted by	Individual/Internal					

Object	ves Ensure executive remuneration scheme is transparent and aligned with stakeholder's interests over the long term.
	This principle is applied to the whole voting scope.
Scope Proces	
	Furthermore, we recommend:  - The integration of clearly identified, quantifiable and relevant extra-financial criteria that are monitored over time;  - Demanding performance criteria that are consistent with the targets disclosed to the market, where relevant.  - Precise qualitative targets whose achievements levels are factually justified by the Board.
	Based on these principles, we voted against 47% of resolutions on executive remunerations in 2017.
	The standards we expect on executive remuneration practices and especially on transparency, are aligned with best practices observed in the most advanced markets and challenging for numerous companies within our portfolio. This is a recurring engagement theme in pre-AGM dialogue, and more generally when we engage with companies throughout the year.
Outcor	However, we witness year after year a signficant improvement in market practices, driven by regulations strenghtening shareholder's voting power on executive remuneration (such as Sapin 2 law in France) as well as shareholder engagement. This is particularly visible for us at companies with which we engage every year in preparation of the AGM, and which have implemented several of our recommendations - enabling us to support their latest voting policy.

6. Bondholder risk (aggressive leverage or share buyback, debt financing of dividend, etc.) The remaining assets invested in corporate bonds integrate ESG criteria but are not SRI-labelled. Finally, the following exclusion policies apply: 1. Exclusion of all controversial weapons for all investments In line with the Oslo and Ottawa conventions, Sycomore AM excludes any investment in controversial weapons. 2. Exclusion policy for SRI funds Please see LEI 04.1. Mandatory Indicate why you conduct negative screening. ☐ For legal reasons ✓ For non-legal reasons Describe your approach to ESG-based negative screening of issuers from your investable universe. Sycomore Selection Credit (SSC) excludes companies that are too risky on 6 key ESG criteria. 1. Environmental risk (upcoming regulations, potential fines, litigation provisions, etc.) 2. Quality of social climate (known social conflicts, abnormally high rates of turnover or absenteeism, etc.) 3. Reputation risk (controversies, activities in highly-sensitive areas or businesses, etc.) 4. Financial communication risk (results vs guidance history, openness and availability to meet with investors, etc.) 5. Accounting risk (independence of auditors, complicated and obscure accounting, etc.) 6. Bondholder risk (aggressive leverage or share buyback, debt financing of dividend, etc.) An issuer that obtains a rating below 2 out of 5 on one of these criteria (or on the overall ESG score), will be excluded from the investable universe. This approach screens out over 30% of the initial universe **☑** Example 1 ☑ Corporate (non-financial) ☑ Environmental ☐ Social ☐ Governance ✓ Negative/ exclusionary ■ Norms-based As part of our environmental risk criteria, we look at upcoming regulations, potential fines, litigation provisions that were made (or not) and whether those are sufficient. Insufficient provisioning can be extremely damaging for companies and in specific cases even lead to bankruptcy. **☑** Example 2 ☑ Corporate (non-financial) □ Environmental

☐ Social **☑** Governance ✓ Negative/ exclusionary ■ Norms-based

	There are numerous analysis, we look at the company and w	scription of how ESG factors are used as the screening criteria s examples showing that accounting risks, if they materialize, can be extremely damaging for a company. As whether there have been instances or fraud or accounting irregularities in the past (and if so how they have bether management in charge at the time in still in place), how independent auditors are (fees paid for audit a working relationship with the company) and how complicated accounting practices are (recurring exceptional enues).	peen handled by and non-audit

Impact on investment decision or performance

Two of our new investment decisions in 2017 were particularly influenced by the bond issuer's contribution to the Energy and Ecological Transition that was key to these investment cases.

In our fundamnetal analysis of the first bond issuer, we valued the succesful business model transformation it started 15 years ago from a Nordic fossil-fuel dependent eletric utility company to a major player in the field of offshore wind electricity production.

In our analysis of the second bond issuer, a Nordic packaging and paper company, we valued the strong commitment of the company towards use of recycled pulp and paper in the production as well as towards sustainable forestry (90% of lands owned or managed covered by forest certification schemes).
